

SOIL AMENDMENT

More than half of residential water use comes from outdoor use. Well-planned landscapes help conserve water by improving soil properties, planting low-water use plants, and maintaining efficient irrigation or sprinkler systems.

Soil Amendment

Little Thompson Water District recommends the addition of soil amendment in areas being prepared for plants and grass. Soil amendment may be organic or inorganic material designed to improve the physical properties of the soil. Amending soil with compost (organic material) improves its ability to hold moisture and may provide small amounts of key nutrients. Other benefits include:

- Reduced compaction*
- Reduced watering frequency*
- Deeper root growth*
- Increased water capacity*

Finding the Best Soil Amendment

Your landscape contractor, local garden nursery, or home and garden store can help you identify soil amendment that's best for local soil and climate conditions.

Guidelines for Amending the Soil

- 1. Purchase soil amendment material – 3 cubic yards per 1,000 square feet of area expected to be planted (a minimum of 1,000 square feet must be amended to receive rebate)*
- 2. Loosen the top 8 inches of soil*
- 3. Till or mix amendment into the top 4 – 6 inches of soil*

Soil Amendment Rebate for All LTWD Customers!

If you are an LTWD customer, you may be eligible for a soil amendment rebate of up to \$500.

Please download the rebate application on our website at littlethompsonwd.colorado.gov/conservation-programs or contact us at 970-532-2096.
